CULTIVATE

Missouri Homeschool Compliance Checklist

What to track to stay compliant · for your records · verified June 2026

Your requirements at a glance

Instruction required	1,000 hours / year · 600 in core subjects · 400 core hours at home
Standardized testing	No standardized testing required
Legal citation	RSMo 167.031

The rule, in plain English

Missouri: 1,000 hours per year, of which at least 600 must be in the five core subjects (reading, language arts, math, social studies, science) — and at least 400 of those core hours must occur at the regular home location. Keep a daily log by subject plus work samples. No notice, no testing.

Your records checklist

- ❑ File your state's required notice, affidavit, or registration — before the deadline.
- ❑ Keep a **daily log of instruction by subject** for each child.
- ❑ Track total **instructional hours** toward 1,000/year (600 of them in core subjects).
- ❑ Save **work samples / a portfolio** for each child (a few per subject, per term).
- ❑ Keep a **curriculum & reading list** of what you taught.
- ❑ Keep any evaluations or progress notes you choose to do.
- ❑ Build a **high-school transcript** as you go (grades 9–12) so credits aren't reconstructed later.
- ❑ Store immunization or exemption records if your state requires them.
- ❑ Keep everything in **one place, backed up** — so a records request is a non-event.

Tired of tracking all this on paper?

Cultivate logs your hours, subjects, attendance and work samples automatically — then generates print-ready compliance reports and transcripts for your state. One app for homeschool *and* home life.

This is a plain-English summary for your convenience (verified June 2026), not legal advice. Cultivate helps you store, organize, and produce your homeschool records — it isn't the authority on what your state requires. Homeschool laws change; always confirm current rules with your state or a homeschool legal resource (e.g., HSLDA) before relying on them. Source citation shown above.
