CULTIVATE

# Vermont Homeschool Compliance Checklist

What to track to stay compliant · for your records · verified June 2026

## Your requirements at a glance

| | |
|---|---|
| **Instruction required** | 175 days / year |
| **Standardized testing** | Yes — standardized testing/assessment required |
| **Legal citation** | 16 V.S.A. 166b |

## The rule, in plain English

Vermont: the equivalent of at least 175 days of instruction, plus an annual year-end assessment kept by the parent (not submitted, per the 2023 change). Enrollment notice at least 10 days before starting; a minimum course of study is required.

## Your records checklist

- ❑ File your state's required notice, affidavit, or registration — before the deadline.
- ❑ Keep a **daily log of instruction by subject** for each child.
- ❑ Track **days of instruction** toward 175/year and keep an attendance register.
- ❑ Save **work samples / a portfolio** for each child (a few per subject, per term).
- ❑ Keep a **curriculum & reading list** of what you taught.
- ❑ Record **standardized test results** if your state requires them.
- ❑ Build a **high-school transcript** as you go (grades 9–12) so credits aren't reconstructed later.
- ❑ Store immunization or exemption records if your state requires them.
- ❑ Keep everything in **one place, backed up** — so a records request is a non-event.

**Tired of tracking all this on paper?**

Cultivate logs your hours, subjects, attendance and work samples automatically — then generates print-ready compliance reports and transcripts for your state. One app for homeschool *and* home life.

$5/month for one parent, $8/month for the family. Cancel anytime.

This is a plain-English summary for your convenience (verified June 2026), not legal advice. Cultivate helps you store, organize, and produce your homeschool records — it isn't the authority on what your state requires. Homeschool laws change; always confirm current rules with your state or a homeschool legal resource (e.g., HSLDA) before relying on them. Source citation shown above.
